TELESCOPES

LAPALUX SHADOW-TELESCOPE II

Product

Order-No.

Description

429-62500

LAPALUX SHADOW-Telescope II

- Direction of view 30°
- Working length: 300 mm
- Connector for Storz/Wolf/ACMI light guide cables

Ø 10.0 mm

This patent Telescope creates Shade

The shade gives more information especially in the depth of field.

Shadow Imaging

The unique design, utilising two light bundles, generates a three dimensional perception of the operating field. Improved orientation may increase work rate and safety.

High Resolution

The high quality optical system guarantees exceptional brightness and full illumination of the finest structures.

Autoclavability

As manufacturer we guarantee full autoclavability at 134 °C / 273 °F. All LAPALUX SHADOW-telescopes are manufactured from stainless steel.

Three-Dimensional Orientation

The surgeon is guaranteed a better three-dimensional orientation of the surgical field through the visualization of shade (natural representation of the pictures).
